IETF Hackathon

**IETF 109
November 8-13, 2020
Online**

Hackathon Plan

- Implement roughtime
  - Show that draft-ieft-ntp-roughtime-03 works
  - CT for time

What got done

- Cloudflare's server (hackathon branch) and Johan Linquist's client interoperated

What we learned

- Portable OS time interfaces
  - Need to expose leap second
- MJD+seconds representation
  - Unusual, conversion routines need careful testing
  - Nonunique/not always valid representation

Wrap Up

Team members: Watson Ladd
Johan Lindquist

First timers @ IETF/Hackathon: Johan
Lindquist
